qTest	DevTools
knowledge of ISTQB	

SKILLS

Communication	Teamwork
Collaboration	Involvement

LANGUAGES

Polish - Native	English - B1

HOBBIES

cycling - especially in the summer

reading popular - scientific books

ABOUT ME

Hello! I'm a surveyor by profession but a few months ago I decided to change my job and started learning manual software testing. I have knowledge in the field of ISTQB - Basic Level and I would like to obtain a Certificate in near future.

My professional experience in geodesy allowed me to improve such features as precise, patience and cooperation with colleagues. In addition, I'm willing to learn and develop new skills.

Before I decided to manual software testing I had got interested in programming so I created simple projects "Currency - calculator" and "To-Do-List" that I could use in creating test cases and bug reports.

CERTIFICATES AND PROJECTS

Training and internship project Junior Software Tester

Inco Academy: Get Into QA Course
- writing test scenarios and test cases and then putting them into practice, bug reporting, teamwork and development of soft skills

Cherry-IT: COLT 1/2023
- creating collection based on Trello documentation in Postman, learning basic REST knowledge

Software tester - comprehensive training
- participation in a 4-day training mainly on ISTQB, consisting of a theoretical, lecture and practical part in the form of workshops
